

# The 2nd China-Africa Sustainable Investment Summit

## The 2nd China-Africa Sustainable Investment Summit

The Second China-Africa Sustainable Investment Summit aims to build an international platform that promotes innovation and cooperation, fostering business innovation in low-income areas and collaboration on renewable energy between China and Africa. This event will bring together key stakeholders from international organizations such as the **World Wildlife Fund (WWF)**, the **Office of the First Lady of Kenya**, and the **Kenya Renewable Energy Association** to discuss and advance innovative cooperation and development in sustainable investment between China and Africa.

### Our goals, facilitated by this platform, include:

- **Knowledge Sharing:** Distribute market trends, technological innovations, and successful cases in the field of China-Africa renewable energy through forums, seminars, and workshops.
- **Business Cooperation:** Establish connections between Chinese and African enterprises, explore opportunities for cooperation, and promote investment and collaboration on renewable energy projects.
- **Network Strengthening:** Enhance the links between participants, creating a lasting cooperative network to support future projects and initiatives.
- **Localization Strategy:** Emphasize the localization of solutions to ensure that energy projects are adapted to local conditions and can bring long-term economic and social benefits.
- **International Support:** Gain the support and guidance of international authoritative institutions, non-governmental organizations, and financial institutions to ensure the sustainability and impact of the projects.

# The 2nd China-Africa Sustainable Investment Summit

## Main Event Agenda:

### 1 Project Roundtable Sessions

- The organizing committee selects innovative projects that match the needs of both Chinese and African parties from the "Spark" plan. Project roundtable sessions are held where Chinese and African enterprises can engage in in-depth discussions and docking to foster cooperation and exchange.

### 2 Roundtable Forum

- Gather industry experts to delve into key topics such as China-Africa impact investment and renewable energy cooperation, promoting knowledge sharing and strategy formulation.

### 3 Awards Ceremony

- The innovative projects collected under the "Prometheus" program will undergo final selection, with awards given based on criteria such as innovation value, impact, and commercial viability.
- At the summit's awards ceremony, these projects and companies will be publicly recognized to enhance their visibility and influence within the industry.

### 4 On-Site Project Visit

- Participants will be organized to visit the Kakuma Refugee Camp for on-site project inspections.
- In-depth exchanges will be conducted with innovative projects from the Kakuma Sandbox Incubation Initiative to assess their implementation effectiveness and potential impact.

**Summit Outcomes:** The event will showcase the cooperation agreements and projects achieved during the implementation of the Prometheus Program, and summarize the experiences gained and lessons learned based on the significant progress made over the three months. The Prometheus Program is more than just a platform for exchange and cooperation; it delves into the actual needs and opportunities for sustainable investment between China and Africa. We will also maintain a long-term, sustainable focus on subsequent project docking and collaboration.
